### 7. Additional detail

Give staff more responsibility and ownership of monitoring PP students' progress against targets. Ensuring staff can identify their PP students within their classroom. Following the review from last year, we will need to look at how we close the gap between PP and Non PP students in the next academic year.

We will carry out a detailed review and case study for each PP student to see where changes can be made to the expenditure and where we may need to introduce different support particularly around supporting students to be classroom ready and to ensure they are ready to learn.
